

We have been attending programs at the PACT Center since my oldest (almost 5 year old!) daughter was 4 months old. To say the programs are instrumental to my children's development is an understatement.

The activities, the guided play, the socialization and the above-and-beyond caring staff all have contributed to their growth. I watched my children have a lot of "firsts" at the PACT Center, first giggles, first friendships, first sing-a-longs, first sensory experiences--even first steps!

The teachers and staff at PACT Center have held the hands of my children through their "first" years on this earth, as well as mine through my "first" years as a parent. I cannot recommend the PACT Center and their wonderful staff enough!
